Memory Craft 350E

Surround yourself with personal style

The Memory Craft machine devoted entirely to embroidery!

They always say it's best to do one thing really well and that's just what the Memory Craft 350E does. It only does embroidery and does it very, very well!

First, you get the legendary Janome stitch quality – no other machine can produce such precise and beautiful stitching, and do it at up to 650 stitches per minute. Then you get all the other great built-in features like tons of designs, on-screen editing, thread brand selection and so much more. Embroidery only... isn't it great to know what you want, and get it!

You'll never run out of designs

Choose from 100 built-in designs Pre-programmed designs let you start creating right away. The style selection ranges from traditional florals to whimsical children's designs.

PC design cards Janome offers a great library of optional PC Design Cards. There's something for everyone – fun, casual, elegant or ornate. Check out each card's design menu online at www.janome.ca

Internet or software There are lots of sites on the internet offering copyright-free designs. Download or digitize designs yourself with easy-to-use optional Janome software, like Customizer 10000 Plus or DigitizerPro. Just transfer the designs to an ATA PC Card or USB Memory Stick to load them into your machine.

USB port There's even a USB port for additional design transfer making it even easier to use countless designs for your creations.

Multi-Folder capability The number of folders is now only limited by the capacity of your ATA Card or USB Memory Stick.

Large & standard embroidery hoops included

Our patented telescopic carriage arm allows the hoop to move forward or backwards with tremendous flexibility. Of course, with the exclusive Janome Clothsetter, your designs aren't limited by hoop size, as you can make embroidered designs of virtually any size with the help of Clothsetter's extra placement.

Optional Clothsetter

That looks easy, because it is!

Put the item you want to embroider in the hoop.

Choose the design you want to embroider.

Attach the hoop and press the Embroidery key. You're embroidering! The MC350E even tells you when to change thread colour.
